SAMUEL CUNDY, Mason and Builder, PIMLICO MARBLE and STONE WORKS, Belvedere Wharf, Pimlico, begs to inform ARCHITECTS and the PUBLIC that he has realised himself of improvements in his MACHINERY, by means of which he is enabled to produce GOTHIC WINDOWS MOULDINGS, PANNELS, &c. &c., at a very cheap rate, out of a superior stone from the west of England, no durable as any soft stone, and particularly sound.

S. C. has an economical method of dressing the above stone over, which produces, by the action of the atmosphere, a surface of crystalline hardness, and improves the colour.

POINTS from M. upwards. Specimens on view of the various styles.

First-rate ARTISTS retained for SCULPTURED and CARVED Works.

Veins Marble Chimney-pieces, of the best quality of material and workmanship, by improved machinery ... 40s.
Stone ditto, from ... 8l.
A variety on view in stock.
MEMORIAL CROSSES, MONUMENTS, TOMBS, HEADSTONES, &c., in great variety of designs.

RESTORATION of CHURCHES. SAMUEL CUNDY having had much practice in this branch, is desirous of ESTIMATING for RESTORATIONS.

CLERKS of WORKS have their particular attention called to the above establishment. Coats of Arms, Decorated Pannels, and other carnished works, promptly executed.

Every description of Stone of Granite work prepared, ready for fixing.—Delivered to the various Railways, and carefully packed in trucks.—Pimlico Marble and Stone Works, Belgrave Wharf, Pimlico.

MARBLE WORKS, BAKEWELL, DERBYSHIRE.—JOHN LOMAS and SONS, Manufacturers by Water Power of Marble Chimney-pieces, Monuments, Hall Tables, &c. &c., beg to inform Architects, Builders, Proprietors, and others, that they have permanently on hand a large stock of CHIMNEY-PIECES, from 20s. and upwards. Black marble squares for flooring furnished at very low prices. N.B. Sheets of drawings and lists of prices forwarded on application.

CARLISLE MARBLE WORKS.—The above works have been established nearly Twenty Years, and have lately been fitted up in a superior manner, with all the latest improvements for working and polishing Marble by machinery. Architects and Builders requiring large orders executed will find a great saving, both in cost and time by intrusting their orders to this establishment. Experienced workmen sent to any part of the kingdom to fit work at a reasonable rate.
THOMAS and JAMES NELSON, Proprietors.

ANSTON STONE, used for Building the New Houses of Parliament.—W. WRIGHT and Co. beg to inform Architects, Engineers, Builders, and others, the Anston Stone can be supplied in any quantity on the shortest notice. This valuable stone, so celebrated for its durability, colour, and texture, is well known, having been selected in preference to all others, by the Commissioners of Woods and Forests, for building the New Houses of Parliament. It is very superior for Monuments, Tombs, &c. &c.

W. Wright and Co. have made arrangements to have a stock always on hand at Brine's Marble and Stone Wharf, Horsfall-basin, Maudet-lane, King's-cross.—Any further information can be obtained on application to W. WRIGHT and Co., Anston, near Sheffield; or to P. SHARP, their Sole Agent in London, 27, Norton-crescent.

CAEN AND AUBIGNY STONE QUARRIES.—LCARD, BEEDHAM, and Co., beg to inform Architects, Engineers, Builders, the Building Profession, and the public generally, that they are importing the above stone from their quarries at D'Allemagne, Calvados Department, being the most approved of any now known; and also from Aubigny, near Falaise, Normandy; and from the increasing experts of Caen Stone, they are satisfied their efforts in selection are becoming extensively known, and from the general adoption of Aubigny, they are assured of its great utility. Aubigny is much finer than Portland, in colour and texture, and free from shell, flints, and other obstruction in working. Its durability may be estimated from its appropriation to Pathhouses, dock, and quay walling, the Royal Chateaux in Normandy, and other public buildings of many centuries standing.

L. B. and Co. have a large and seasoned stock of the above at their general Depot, Caen Stone Wharf, Rotherhithe, near the Lavender Dock Pier; also at Messrs. BRINE, BROTHERS, Battle-bridge; No. 8, Paddington basin; Vauxhall bridge; and Kensington basin.—Orders executed with dispatch to any part of the United Kingdom.—Offices, 18, Southwark-square, Borough; and Caen Wharf, 178, Rotherhithe-street, Rotherhithe.

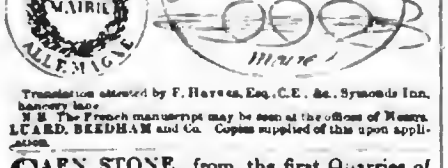
NOTICE to PURCHASERS of CAEN STONE.

Translation of a CERTIFICATE from the Mayor of Allemagne, Department of Calvados, Normandy, relative to the propriety of the Caen Stone Quarries:—

"I, the Mayor of Allemagne Department of Calvados, undersigned, do hereby certify to all who are interested in it, that it is an error and gross falsehood, as certain persons have reported, 'That the quarries of Allemagne belong to, and are leased from, the Government of France, and the local authorities of the Department of Calvados.' Neither the one or the other have any right or interest whatsoever in the said land or quarries.

"I hereby further certify, that the greater part of these quarries are worked by Messrs. Leard and Company, who are the principal proprietors, and Mons. Jobert, who is also a proprietor; the remainder are worked by smaller quarrymen of the neighbourhood, who sell their produce to certain dealers for exportation to England as it is required.

"Executed at Allemagne, this 28th May, 1849.



Translation attested by F. Harvey, Esq., C.E., &c., Symonds Inn, Chancery lane.

N.B. The French manuscript may be seen at the offices of Messrs. LCARD, BEEDHAM and Co. Copies supplied of this upon application.

ROMAN CEMENT, made according to the specification of Parker's Patent, may be had genuine of J. M. BLASHFIELD (late Wyatt, Parker, and Co.), Waterloo Dock Wharf, Commercial-road, Lambeth, No. 1, Ironmaster Wharf, Paddington, and at the Manufactory, Mill Wall, Poplar. Also Plaster, Mastic, Tarras Bricks, Tiles, &c.

VEINED AND SICILIAN MARBLE in Scantlings and Slabs of the first quality, just imported.

PARIAN CEMENT, for internal stucco, instead of common plastering, may be painted and papered within twenty hours of its application to the bare walls, and by the use of which rooms may be rendered habitable before the material commonly adopted would begin to dry. It is worked without the slightest difficulty, the labour being easier and less expensive than with any other stucco whatever. A finer quality is also prepared for ornamental plastering, for enrichments, &c. &c.—Specimens of which may be seen at the works of the Patentees, CHAS. FRANCIS and SONS, Stone Elms, London.

KEENE'S PATENT MARBLE CEMENT forms an exceedingly hard and indestructible Stucco, which may either be prepared for paint, or finished in imitation of stone, by the addition of Portland or other stone dust.

It is a cheap and efficient substitute in place of wood for skirting, architraves, and other mouldings, in its application for which purposes it checks the progress of Fire and the attacks of Vermin.

Patentees and sole Manufacturers, J. B. WHITE and SONS, Millbank-street, Westminster, and Seel-street, Liverpool.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost; and when used as a stucco it does not vegetate or turn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it carries four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior cementing power, combined with its undoubtedly hydraulic properties, point it out as the truest material for building sea and embankment walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.

Manufacturers—J. B. WHITE and SONS, Millbank-street, Westminster, and 36, Seel-street, Liverpool.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to Nos. 286, page 491; and also Nos. 294 and 295, pages 543 and 551 of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in its cementitious qualities, harder, and more durable than any other description of Cement; it does not vegetate, crystallize, or turn green; nor is it affected by any atmospheric influence whatever the climate, resisting alike the action of frost and heat. It is manufactured to set in from fifty to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also by their Agent at the Depôt, 1, Rock Grove, Liverpool.

MARTIN'S PATENT FIRE-PROOF and ORNAMENTAL CEMENT.—REDUCTION of PRICE.—The Patentees beg to inform their Friends and the Public that they have made arrangements which enable them to offer this invaluable cement at a considerably reduced price. It has now been before the public so many years, and has obtained so high a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. The Patentees, however, feel called upon to observe, that by its use—from the greater amount of surface which a given quantity will cover, and the small amount of labour required in working it, a saving of 25 to 30 per cent. is effected as compared with other cements for internal use. Specimens shewing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement in any quantity obtained of the Patentees, Messrs. STEVENS and SON, 25, St. Peter's Plaster and Cement Works, 138, Drury-lane, London.—Agent for Liverpool.

Mr. GEORGE NEWTON, No. 6, Lawton-street, Bold-street.

JOHN'S and Co. PATENT STUCCO CEMENT and PAINT.—GREAT REDUCTION of PRICE.—The Patentees beg to inform the trade and the public generally, that in order to induce a more extended adoption of these excellent materials, and to bring them into direct competition with the inferior articles in common use, they have determined to reduce the price nearly 25 per cent., confidently expecting to a mutually advantageous result. These materials, for their beauty, durability, imperviousness, perfect resistance to frost or heat, and great cheapness, fully justify the confidence reposed in them, as shown by numerous testimonials. For INTERIOR SURFACES this cement possesses the following: unrivalled properties; having no caustic qualities, it may be painted on or papered within a few days after its application, and a new house may thus be rendered habitable without any delay. It never blisters, cracks, or vegetates; very soon becomes as hard as stone, and may be cleaned with a brush and water.—Prospectuses, specimens, and every information connected with its use, price, &c., may be obtained from the sole agent, PHILIP HARE, at the Warehouse, 22, Steel-yard, Upper Thames-street.

TO PLASTERERS, BUILDERS, &c.

JOHN'S and Co. PATENT PERMANENT STUCCO WASH.—The attention of the trade is requested to the permanent wash, which cannot be equalled in its properties of beauty and durability for exterior stucco or brick, and being a non-absorbent, is admirably adapted for interior purposes, for railway stations, union workhouses, schools, asylums, barracks, stables, prisons, &c. It will not wash off, may be tinted to any colour, and 1 cwt. will cover 300 yards.—Price 10s. per cwt. Sole agent, PHILIP HARE, 22, Steel yard, Upper Thames-street.

WARWICKSHIRE CEMENT.—To Architects, Engineers, Contractors, and Builders.—R. GREAVES solicits the notice of the Profession and Trade to the new superior CEMENT he is now manufacturing at his Works, Stratford-on-Avon and Southam; the "Warwickshire" resembling "Coan" stone, and the "Improved" a dark tint of the "Bath," both of which will be found unequalled, especially for hydraulic purposes.
